

Marjia Afroj

Software Engineer

📍 Mirpur, Dhaka-1216 | ✉ marjiaafroj2@gmail.com | ☎ +880 1755-365515
🌐 Marjia-Afroj | 🌐 MarjiaAfroj

TECHNICAL SKILLS

Programming Languages: Python • Golang • JavaScript • TypeScript • C++ • C
Web Technologies: React • NextJS • HTML • CSS • Tailwind CSS • Django • Flask
Cloud & Infrastructure: AWS Services (S3, EMR) • Apache Iceberg • PySpark
Data & Analytics: Data Processing • ETL Systems • Data Scraping (Scrapy) • Time Series Analysis
Development Tools: Git • GitHub • GitLab • Postman • Jira • Selenium • REST APIs
Databases: PostgreSQL • MySQL

PROFESSIONAL EXPERIENCE

Junior Software Engineer

Dec 2025 – Present

NidusLab, Dhaka, Bangladesh

- Currently working as a backend software engineer; built the real-time chat system for **NidusJob.com**.
- Worked on **NidusService**, a platform for service providers.
- Working on **Career College** - a LMS platform.

Junior Software Engineer

March 2025 – June 2025

W3 Engineers Ltd, Dhaka, Bangladesh

CRON Data Systems Team

- Architected and implemented large-scale data processing solutions using PySpark, handling TB-scale datasets daily
- Developed ETL system optimization strategies using multiple AWS services, improving execution time and reducing costs
- Built and deployed EMR system scripts for data system re-architecture initiatives
- Implemented automated data extraction, modification, and validation scripts for production systems
- Conducted R&D on CRON Data System Re-Architecture to enhance scalability and performance

Data Analytics Team

- Developed automated CRON scripts for analytics dashboards and real-time notifications to Slack and Microsoft Teams
- Maintained production systems with proactive monitoring and bug resolution using Sentry
- Collaborated on distributed team projects with focus on system reliability and performance optimization

Intern Software Engineer

Nov 2024 – Feb 2025

W3 Engineers Ltd, Dhaka, Bangladesh

Individual Development Projects

- Built full-stack applications using NextJS, NodeJS, and TypeScript with modern development practices [GitHub]
- Developed microservices architecture using Python and Flask for scalable backend systems [GitHub]
- Implemented secure API integrations using Golang with emphasis on performance and reliability [GitHub]
- Created automated testing frameworks using Python and Selenium for quality assurance [GitHub]
- Integrated Large Language Models (LLMs) into backend systems for enhanced functionality [GitHub]
- Developed data scraping solutions using Python and Scrapy for data acquisition pipelines [GitHub]

Team Collaboration

- Contributed to ETL system development using PySpark, Apache Iceberg, and AWS cloud services

- Participated in data processing R&D initiatives for high-volume, distributed systems

Machine Learning Trainee

April 07, 2023 - April 21, 2023

Code Studio, Rajshahi

- Specialized in machine learning techniques for time series data analysis and prediction
- Developed and implemented various predictive models for data trend analysis

KEY PROJECTS

Real-Time Chat Application	Backend GitHub Link	Frontend GitHub Link
• Developed a real-time chat system with WebSocket connections for instant messaging, file sharing (text, images, videos, audio), and smart notifications. • Implemented presence tracking using Redis to determine when users have chats open, automatically managing read receipts and notification delivery. • Tech: Django, Django REST Framework, Django Channels (ASGI), PostgreSQL, Redis, Python, JWT Authentication, Django Signals.		
Online Beauty-Product E-Commerce Platform	GitHub Link	
• Developed comprehensive e-commerce solution with secure user authentication and email verification • Implemented advanced search functionality, shopping cart management, and payment integration • Built admin panel with full CRUD operations and user management capabilities • Technologies: Python, React, Django, Redux, PostgreSQL		

ACADEMIC BACKGROUND

Bachelor of Science in Electrical and Computer Engineering	2019 - 2024
Rajshahi University of Engineering and Technology (RUET)	CGPA: 3.50/4.00
Higher Secondary Certificate	2016-2018
Saidpur Government Science College	GPA: 5.00/5.00

ADDITIONAL EXPERIENCE

Technical Leadership

- Technical Team Member for Technocracy 2019, organized by RUET
- Experience in team collaboration and technical event management

LANGUAGES

- English - Professional Working Proficiency
- Bangla - Native Speaker
